# Built-In Ovens

With the largest capacity in their class, efficient convection capabilities and the fastest preheat settings available, it's no wonder Bosch ovens are a top choice for European chefs. Discover for yourself how Bosch performance and design make a delicious addition to your kitchen.

# If our ovens made dinner any more convenient, you'd have to tip them 20%.

We developed a taste for innovation. Even if we tried to find room for compromise, we couldn't. Otherwise, it wouldn't be Bosch. So it wouldn't offer the #1 capacity oven on the market. Or our EcoClean® Self-Clean cycle. And it certainly wouldn't meet our 100% quality testing before leaving the factory.

## Performance

**#1 in capacity***
At 4.7 cubic feet, our oven is **the largest in its class**. An expansive viewing window and bright halogen lighting system make monitoring the progress of your meal easier than ever.

**Recessed heating element**
A recessed top heating element and a fully concealed bottom heating element allow **unprecedented safety when removing dishes** and extremely easy cleaning.

**Genuine European Convection with ACS****
Our Advanced Circulation System (ACS) allows food to be **cooked more evenly in up to 30% less time** by optimizing heat circulation. And a powerful 2,000-watt third heating element surrounds the convection fan, circulating preheated air throughout the oven.

Model shown above: HBL8650UC / **42373**

* Based on AHAM measurements of 27" wall ovens. ** Features may vary by model.

**Fastest preheat**/*****
With the **fastest preheat on the market***, Bosch ovens are ready to cook in about seven minutes.

**Warming drawer**
Convenient. Functional. Stylish. Bosch offers a warming drawer with four settings for prewarming dishes, heating rolls or keeping food hot for late arrivals.

**Meat probe**
This built-in temperature gauge is perfect for keeping tabs on large roasts and poultry dishes. When your dish reaches the preset internal temperature, the oven beeps and turns itself off — giving you **optimal temperature control**.

**Convection microwave****
Bosch convection microwaves offer you **faster and more even cooking results** than traditional microwaves.

**Multiple recipes****
Our microwaves offer **multiple recipe settings** to make cooking easier.

## Quality

**Telescopic racks**
This full-extension rack **glides easily on ball bearings** and extends over the open oven door for easy access, allowing you to baste large cuts of meat and poultry safely without reaching into the oven.

# Cooktops

## Induction cooktops

Induction cooktops are a revolutionary way of cooking that use the power of electromagnetic waves to quickly and efficiently turn the bottom of a pot into an active heating surface, rather than the cooktop. Induction cooktops use 60% less energy than cooking with gas and heat food over two times faster than electric cooktops.

## Gas cooktops

To create a variety of dishes, you need a versatile cooktop. High-BTU-output burners deliver a range of flame settings, while a separate, low-output burner provides gentle simmering. The large knobs are easy to adjust to get the perfect flame. Multiple-size burners accommodate all cooking styles. And the burners' sealed, recessed design contains spills and makes cleanup easy.

Model shown: NET8654UC / **42583**

## Electric cooktops

From the simple elegance of the ceramic-glass cooking surface to the exciting performance features, Bosch electric cooktops are the very image of understated sophistication for the kitchen. Whether you choose the refined touch-control models or the familiarity of our rotary-dial units, you'll find a model that suits your design aesthetic and cooking style.

# Three brilliant ways to cook. One superior way to engineer them.

We know the importance of precision in cooking. And we engineer our gas, electric and induction cooktops accordingly, ensuring precise temperatures for legendary cooking performance. Gas provides perfect flame control, from 14,000 BTU to soft simmering. Electric cooktops offer easy-to-clean, contemporary Touch Controls. And our induction cooktops heat food over 50% faster than electric and use 60% less energy than gas.

## Quality

**PreciseSelect™***
Easily change the heat level of the cooktop by simply selecting any of the **17 different levels** with a single touch.

**SteelTouch™ controls***
Offers **more responsiveness** than glass controls while providing a seamless, sharp stainless steel design.

**AutoChef®***
Patented AutoChef technology takes the guesswork out of cooking by **maintaining the ideal temperature** for perfect cooking results every time.

**CountDown timer***
The days of working over a hot stove are long gone, thanks to this ingenious function that allows you to **preset a cooking time for each individual heating element**. Now you can multitask in the kitchen, and the cooktop will automatically shut off the individual cooking elements when their programmed time has expired.

**Glass touch control***
This touch-sensitive control panel uses the **most advanced technology** on the market. It has a digital readout of the chosen power setting and residual heat indicator to prevent accidental injury.

## Safety

**ChildLock**
Bosch electric cooktops take safety up a notch. **The ChildLock function** prevents the cooktop from being accidentally switched on.

**Anti-overflow system**
Sensors in the glass can **detect large spills or excessive overflow**, automatically shut off the cooktop, and sound an alarm to alert you of the situation.

**Automatic shut-off system**
Safety comes first. So Bosch electric cooktops are designed to **automatically switch off** when the unit exceeds a maximum temperature limit.

**Heat indicator**
A light on the cooktop **warns if surface is hot** due to any residual heat from cooking vessel.

**Safe Start**
This safety feature accurately **distinguishes between pots or pans and smaller items like utensils** that may accidentally be left on the cooktop, and ensures that each cooking element will only heat up if a pot is detected on the cooking surface.

**Clean Lock***
Clean Lock **prevents unwanted changes** to settings while you clean spillovers.

**Automatic reignition***
The automatic reignition will **generate a spark and reignite** the burner if the flame should go out.

* Features may vary by model.

Model shown: NGM8654UC / **20853**

## Performance

**PowerStart®***
This feature temporarily increases and holds the temperature at the most powerful setting. Then it gradually declines to your preset level. This **reduces cooking time** and offers the convenience of one-button operation.

**Keep Warm function***
When this function is selected, it enables you to reduce the cooking power to as little as 3% of normal—much greater temperature control than conventional cooktops offer you. **This brings the heat to a perfect level** to keep meals warm, or to simmer soups.

**Dual-element burners**
Burners provide solutions to multiple cookware sizes. They are designed to **use the cooking space more efficiently** than single elements.

**Triple-element burners***
The burners are available in 6"/8"/12" configurations, and are designed to efficiently accommodate a wide variety of cookware **without wasting energy unnecessarily**.

**Bridge element**
Connects two burners, creating an **elongated cooking surface** for larger, oval-shaped pans.

* Features may vary by model.

**Continuous grates***
These are the **same types of grates found in restaurant kitchens**, letting you slide and move pots off of an active burner or rearrange them without fear of tipping or spilling. They also give the cooktop a high-grade, quality appearance that really makes an impression.

**PowerSim® burner***
This feature, available on our largest burner, uses a diffuser cap to output a large flame of up to **18,000 BTU for quick heating**, and can gently simmer like a small burner.

**30" five-burner gas cooktop***
The industry-leading 30" five-burner provides **high performance and versatility** in a 30" space.

**OptiSim® burner***
This Bosch burner heats at a low BTU to delicately simmer even the most sensitive sauces or melt chocolate by **evenly spreading the flame** across the bottom of the pot to help prevent scorching.

**Class-leading 11" element**
Conducting up to 4,400 watts of power, the 11" element on the 36" cooktop is the **most powerful in its price class**.

**SpeedBoost®***
For time savings as well as energy savings, the SpeedBoost function can **heat water twice as fast** as a conventional ceramic cooktop.

## Efficiency

**PotSense™***
Bosch induction cooktops detect if a pot is placed on a cooking element and **automatically adjusts the cooking field** to the size of the pot bottom. This makes your kitchen cooler, more energy-efficient, and safer.

Bosch's super-efficient, high-performance ventilation products literally freshen the air. Capable of up to 600 CFM, they quickly remove steam, odors, grease and smoke, without adding any distracting noise. As superbly designed as they are quiet, every Bosch ventilation system perfectly complements any Bosch cooktop or range.

### Quality

Your meal should be memorable, not its odor. With Bosch's line of quiet, efficient, high-quality ventilation products, you can quickly remove steam, odors, grease and smoke, improving your home's overall air quality.

### Quietness

The sound you don't hear might just be cleaning your air. All of our ventilation products are designed to be extraordinarily quiet. With products as quiet as 53 dBA, our powerful dual-inlet blowers operate at whisper-like volumes.

### Performance

Steam, smoke, grease odors—nothing resists our efficient ventilation systems. With four-speed fans, dual blowers and a wide CFM range, you can adjust the fan to the desired amount of exhaust power. And all this power almost goes unnoticed because our hoods are also quiet. Extremely quiet.
